CYTTACARES

CRISIS ALERT & RESPONSE EMERGENCY SYSTEM

Connecting schools with first responders in real-time.

PUSH 1 BUTTON for instant connection between schools and emergency responders.

This simple and comprehensive system provides real-time alerts, rapid two-way secure video alerts and communication, and efficient response coordination, ensuring the well-being of students, staff, and faculty.

SOS BUTTON
Direct video alert to first responders – also functions as a silent alert button

VIDEO
Real-time secure video communication – instant situational awareness

TEXT
Full text capabilities with full end-to-end encryption

LOCATION
Automatically track user locations on a live interactive map

CyttaCares gives us hope!
It connects us in real-time when every second counts.

Real-time location tracking for first responders en route and school staff online once SOS alert is initiated, enabling enhanced coordination and resource allocation

Data Privacy and Security – military grade encryption keeps your sensitive data protected

Permissions and access - granted by the school admin based on roles and responsibilities

Proprietary compression algorithm – provides uninterrupted communications among users

Intuitive interface enables users to quickly and discreetly initiate alerts
